## AFTERNOON PROGRAMME STRATEGY & INVESTMENT

### GROUND FLOOR

12:45 - 13:05

### MASTERPLAN DATA CENTER

Lars Reubekeul  
DLA Piper

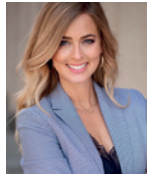

Whether due to climate change, rising electricity costs or increasingly scarce building land - the data center industry is rapidly changing. This has also been recognized by the city of Frankfurt, which is home to around 60 company-independent data centers. With its new „Data Center Master Plan“, the city intends to regulate the construction of new data centers more strictly in order to do equal justice to the data center industry and other sectors of the economy.

Lars Reubekeul will provide an overview of the new regulations in Frankfurt, their legal implications and possible future developments.

## AFTERNOON PROGRAMME BUSINESS TRENDS

### FIRST FLOOR

12:45 - 13:05

### CRITICAL INFRASTRUCTURE – MOVING INTO COLOCATION

Matthias Reidans  
Rosenberger OSI

In the course of digital transformation, many companies are moving IT to colocation data centers. However, there are a number of things that need to be taken into account, especially for organizations and companies with increased protection requirements. This is because the KRITIS regulation, which has been updated in January 2022, obligates operators of critical infrastructures to comply with special guidelines. What do operators of Critical Infrastructures need to consider when selecting a colocation? How can colocation operators guarantee their customers secure availability meeting KRITIS requirements?

13:05 - 13:45

15:20 - 15:40 INCREASING VALUE IN DATA CENTER HARDWARE OWNERSHIP – HOW SUPPLY CHAIN SIMPLIFICATION CONTRIBUTES TO FINANCIAL AND SUSTAINABILITY GOALS

Jelle Slenters  
Sims Lifecycle Services

Jelle Slenters looks at trends impacting the German data center industry and offers his perspective on simplification of supply chain becoming a competitive advantage. As the data center industry continues to experience growth resulting from high demand it is also seeking to hit environment, social and governance (ESG) goals and financial budgets at the same time as reducing complexity.

15:40 - 16:00 THE EDGE JOURNEY. DEFINING FUTURE-PROOF INFRASTRUCTURE MODELS FOR DECENTRALIZED DATACENTERS.

Peter Lambrecht  
Vertiv

The presentation will handle challenges and opportunities related to sustainability of edge data centers and data centers in general.

Why can't a data center be more than a data center? Think outside the box!

# TUESDAY 19 SEPTEMBER

## 19:00 GDA YOUNG TALENT AWARD CEREMONY

For the first time in 2022, the **German Datacenter Association** will award the Young Professionals Award for outstanding dissertations in the field of data centres and digital infrastructures. Young professionals and start-up companies can also apply with their ideas for the special prize „Sustainable Data Centers“.

The winners were selected by an independent jury of experts headed by Prof. Dr. Peter Radgen, IER, University of Stuttgart.

Prof. Dr. Kristina Sinemus, Hessian Minister for Digital Strategy and Development, will award the prizes at the gala dinner.
